

## TIES News October 2015

### 26th Annual Conference of The International Environmetrics Society

The International Environmetrics Society (TIES) will hold its 26th [Annual Conference](#) in Scotland on 18-22 July 2016.

Themes of the conference include:

Methods in expert elicitation;  
Space time modelling of disease risk;  
Statistical climatology;  
New monitoring technology;  
Earth observation;  
Spatial and/or spatio-temporal modelling of environmental processes;  
Statistical Ecology;  
Circular data in environmental studies;  
Natural Hazards;  
Linking process and statistical models ;  
Uncertainty Quantification in Environmental Prediction;  
Environmental criminology;  
Statistics for massive environmental data;  
Quantifying Environmental Benefits;  
Environment and Health;  
Biodiversity measures and modelling;  
Environmental Risk;  
Environmental or Climate Extremes;  
Functional data;  
Environmental Economics;  
Citizen Science.

Further information is available on the conference website <http://www.icms.org.uk/workshops/TIES2016>
