

The International ENVIRONMETRICS Society - TIES

27th Annual Conference of The International Environmetrics Society joint with GRASPA 2017 on Climate and Environment

24-26 July 2017, Bergamo, Italy

The 27th Annual Conference of The International Environmetrics Society, will be held 24-26 July 2017, at the University of Bergamo, Italy.

The tradition of the annual TIES conference is renewed next year by this annual TIES conference as a satellite of the 61st World Statistics Congress of the International Statistical Institute, which will be held in Marrakesh. Moreover, the tradition of collaboration with other scientific institutions is carried on by joining with GRASPA 2017 conference. The conference focus on climate and environment is intended to be inclusive of members scientific interests and to attract new climate and environmental scientists.

LOCATION: Bergamo is 40km from Milan. Its historical center is over the hill (Città alta) and is characterized by magnificent buildings in ancient Venetian style (1428-1797 AD). In addition to art and history, both Città alta and new city offer a number of restaurants specialized in Italian cuisine and, in particular, in Bergamo cuisine.

CONFERENCE TOPICS:

- Climate change assessment and monitoring,
- Impact on Environment, Ecological systems,
- Biosphere, Atmospheric variables, Meteorology, Energy,
- Water bodies, Desertification,
- Food sustainability, availability and security,
- Human health, Population and migrations,
- Economics and Finance,
- Spatial and spatio-temporal modelling,
- Functional, directional and complex data,
- Change point methods,
- Official statistics for Climate change,
- Extreme values.

The Conference venue will be at the University of Bergamo (www.unibg.it). Unibg is a medium university with 15'000 students. Aula magna, located in Città alta, is in the recently refurbished Sant'Agostino previous church (1290 AD).
