

## 2017 ISI Jan Tinbergen Awards

The ISI is pleased to announce the results of the 2017 competition for the Jan Tinbergen Awards. These biennial awards, named after the famous Dutch econometrician, recognise best papers from young statisticians from developing countries. Two awards were given for this year's competition.

The first prize winner is:

Mr. Marcelo Bourguignon Pereira from Brazil for his paper Modelling time series of counts with deflation or inflation of zeros.

The second prize winner is:

Mr. Christian Eduardo Galarza Morales from Brazil for his paper Robust logistic quantile regression models using skewed heavy-tailed distributions.

The awards will be presented to the winners at the Awards Ceremony at the ISI World Statistics Congress in Marrakech, Morocco, in July 2017. The winners will receive a cash prize as well as funding to support their participation at the Congress, where they will present their papers.

The ISI is grateful to the Dutch Foundation 'Stichting Internationaal Statistisch Studiefonds' for its generous support of these Awards.

We also thank the members of the Jan Tinbergen Jury, chaired by Dr. Yves-Laurent Grize, for their work in evaluating the nominations and selecting the award winners.

Helen MacGillivray, ISI Awards Committee Chair and ISI President-Elect  
Pedro Silva, ISI President
