Proposals for ICOTS Contributed Papers Due 15 October

Although invited paper proposals for the Tenth International Conference on Teaching Statistics (ICOTS-10) have closed, proposal submissions for Contributed Papers (Topic 11) will remain open until 15 October. Please check submission details on the ICOTS-10 website: <http://icots.info/10/?submissions>

Free Online Courses on Teaching Statistics Starting Soon

At the Friday Institute at NC State, join lead designer and instructor Hollylynne Lee and colleagues from around the world in flexible and free online professional development in TWO Teaching Statistics courses.

1) Teaching Statistics Through Data Investigations began 11 September (although joining is still possible): To help ensure students are future ready to use data for making informed decisions, many countries around the world have increased the emphasis on statistics and data analysis in school curriculum – from elementary/primary grades through college. This course allows you to learn an investigation cycle to teach statistics and to help students explore data to make evidence-based claims. Visit go.ncsu.edu/tsdi to learn more & register today!

2) A NEW! course, Teaching Statistics Through Inferential Reasoning, begins on 2 October. To prepare the next generation of data active citizens, we need to engage learners of all ages in investigations focused on making inferences and claims, supported by samples of data. This course can assist you in developing instructional strategies to emphasize inferential reasoning through posing different inferential questions. Visit go.ncsu.edu/tsir to learn more & register today!
