

ISI and Esri sign Memorandum of Understanding at the 49th Session of the UN Statistical Commission

Esri is a worldwide leader in the development of geographic information systems (GIS) solutions. This MOU is focused on collaboration in the area of statistical geospatial integration, capacity building and education. Esri and ISI will cooperate in organizing capacity building workshops, collaborating and supporting conferences and congresses, and organizing a new 'spatial statistics' international undergraduate student competition.

The MoU was signed at UN HQ on 6 March 2018.
