

IASC News December 2018

The IASC-ARS 25th Anniversary Conference & CASC 2nd Annual Conference

The IASC-ARS 25th Anniversary Conference was successfully held at the Beijing Conference Center, China, on 9-11 November 2018. The conference is a joint meeting of the 25th Anniversary Conference of the Asian Regional Section of the International Association for Statistical Computing & the 2nd Annual Conference of the Chinese Association for Statistical Computing (CASC). There were four keynote speakers: Donald B. Rubin, Jun Liu, Wing Kam Fung and Fang Yao. The conference was well attended by about 150 participants from many countries and regions with many parallel sessions and poster presentations.

Group Photo of IASC-ARS Conference

To celebrate the 25th Anniversary of IASC-ARS, we have established the Distinguished Service Award in recognition and with sincere appreciation for the dedicated effort and outstanding service to the IASC-ARS. It was announced in the opening ceremony of the conference that the recipients of the first Distinguished Service Award are Professor Jae Chang Lee and Professor Yutaka Tanaka. The Distinguished Service Award Presentation Ceremony took place during the conference dinner.

W.K. Fung and Jae Chang Lee

W.K. Fung and Yutaka Tanaka

A big thank you to all who participated in making the conference a great success. Special thanks to the Center for Statistical Science, Tsinghua University for their tremendous support they have provided as host and to the Conference Organizing Committee, particularly Ke Deng, Lin Hou, Hanzhong Liu and Yuan Tian in scheduling the talks and arranging all the logistics for the conference. Without their efforts and time, it would be impossible for us to have such a successful conference.

LARS-IASC School on Computational Statistics and Data Science

Statistics of extremes: Modeling, inferences, and applications

The Latin American Regional Section (LARS) of the International Association for Statistical Computing (IASC) will organize its first "LARS-IASC School on Computational Statistics and Data Science" in Salvador, Brazil, from November 15-17, 2018, under the topic "Statistics of extremes: Modeling, inferences, and applications". The main purpose of the LARS-IASC School is to spread the knowledge base and advances in Statistical Computing in Latin American countries and to increase the quality and quantity of researchers in the field. The "LARS-IASC School on Computational Statistics and Data Science" will be a satellite event of the 1st Conference on Statistics and Data Science, that will also be held in Salvador, Brazil, from November 12-14, 2018.

The LARS-IASC School on Extreme Value Theory will feature the lecturers Miguel de Carvalho (University of Edinburgh, Scotland, UK), Manuele Leonelli (University of Glasgow, Scotland, UK) and Dani Gamerman (Federal University of Rio de Janeiro, Brazil).

More information about the program and registration for the LARS-IASC School on Computational Statistics and Data Science can be found [here](#).

Final CRoNoS Spring Course

The final CRoNoS Spring Course will take place at the Poseidonia Beach Hotel, Limassol, Cyprus, 14-16 April 2019. The aim of this training course is to put together several tutorials on topics related to robust statistics, computational statistics and the treatment of non-standard data. The course is sponsored by COST and IASC-ERS.

Eligible PhD students and Early Career Investigators can apply for grants. More details can be found at cmstatistics.org/CRONOSMDA2019.

Forth Latin American Conference on Statistical Computing Guayaquil, Ecuador, May 28-31, 2019

The Forth Latin American Conference on Statistical Computing (LACSC 2019) will be held in Guayaquil, Ecuador, from May 28-31, 2019. This international conference, will be held together with the International Conference on Robust Statistics (ICORS 2019), which is the most important event in Robust Statistics. Its aim is to gather researchers interested in statistical computing in Latin America and from other parts of the world, and is the official conference of the Latin American Regional Section of the International Association for Statistical Computing (LARS-IASC). More details about the LACSC 2019 will be available soon.

The Conference of Data Science, Statistics & Visualisation (DSSV 2019)

The conference of Data Science, Statistics & Visualisation (DSSV 2019) will take place on August 13-15, 2019 in Kyoto, Japan. This conference is a satellite meeting of the 62nd ISI World Statistics Congress. The venue of DSSV 2019 is the Imadegawa Campus of Doshisha University. The

details can be found at the [website](#). At this site, registration and abstract submission will be received since Feb. 5, 2019, with the deadline of abstract submission May 7, 2019. Further, at the site, rooms in the hotels convenient for the venue can be reserved, soon later.

This meeting shall create a forum to discuss recent progress and emerging ideas in these different disciplines. The conference welcomes contributions to practical aspects of data science, statistics and visualisation, and presentations can cover topics such as machine learning, verbalization of data, big data infrastructures and analytics, advanced computing, and other important themes.

Di Cook and Kwan-Liu Ma present keynote talks. Genevera Allen, Carson Sievert, Yongdai Kim, and Hidetoshi Shimodaira give invited talks. Those talks ensure a high-quality scientific program. The committee also is considering invitation of other speakers. In

addition, the invited sessions from the International Society for Business and Industrial Statistics (ISBIS), the Bernoulli Society, and others will contribute to an exciting program.

The venue, neighboring the Kyoto Imperial Palace, can be reached within 10 minutes via a subway from the Kyoto central station. The welcome reception and conference dinner with

traditional Japanese style will be thrown at the areas close to the downtown, which can be reached easily from the venue within about twenty minutes via some transports. As Kyoto had been the Japanese capital for a long period (794-1868), there are 17 world heritages (including Kinkakuji temple presented left), each of which can be reached by a half-day travel at most from the venue.

The IASC-ARS 2019 Conference

Call for Invited Session Proposals for the 2019 IASC-ARS Conference – 2-5 December 2019, Hong Kong

The 11th IASC-ARS Conference will be held at the University of Hong Kong, China, on 2-5 December 2019. The theme of the conference is “Statistical Computing for AI and Big Data”. The aim of the conference is to provide a forum for the discussion and exchange of ideas, new concepts and recent methods in statistics. Philip Leung-ho Yu from the Department of Statistics and Actuarial Science of the University of Hong Kong will be the General Chair of the conference.

The Local Organizing Committee of the IASC-ARS 2019 invites submissions of Invited Session Proposals. An invited session proposal includes a session title, general description of the session, list of speakers, and tentative talk titles.

Submissions may be made by email to miasc-ars2019@hku.hk. The submission deadline is **28 February 2019**. The organizers will be notified of the review committee’s decision by **31 March 2019**. Click [here](#) for the poster of **Call for Invited Session Proposals** for the details.

Keynote Speakers: Wolfgang Karl Härdle, Jun Liu, and Qiwei Yao

Local organizer: Department of Statistics and Actuarial Science, The University of Hong Kong

We look forward to seeing you in Hong Kong!

Cluster Benchmarking Challenge Call Neutral Benchmarking Studies of Clustering

The Cluster Benchmarking Task Force of the International Federation of Classification Societies (IFCS) is calling for neutral benchmarking studies in cluster analysis. This call is part of a challenge connected with the 2019 IFCS conference in Thessaloniki, Greece, August 26-29.

To achieve a cumulative building of knowledge on clustering and classification, careful attention to benchmarking (performance comparison of methods) is very important. New methods of data pre-processing, new data-analytic techniques, and new methods of output post-processing, should be extensively and carefully compared with existing alternatives, and existing methods should be part of neutral comparison studies. Benchmarking studies can frequently be found in supervised learning, but are less common in unsupervised learning.

The Task Force has written a white paper (for a preprint, see: arxiv.org/abs/1809.10496) that addresses the theoretical and conceptual underpinnings of benchmarking in cluster analysis, and some practicalities for performing sound benchmarking studies. The Task Force is now calling for individuals to contribute neutral benchmarking studies on cluster analysis as part of a challenge.

Rules for submission:

- Contributions for the challenge must be e-mailed to Iven.VanMechelen@kuleuven.be.
- A contribution should comprise a report on a benchmarking study in the context of cluster analysis. This report should have a length of between 5 and 15 pages, including text, tables, figures and references; other materials can be submitted as separate files.
- The benchmarking study may compare methods of data pre-processing, clustering (potentially but not necessarily including the estimation of cluster parameters such as the number of clusters), and/or output post-processing, and may use empirical or simulated data.
- Contributors should have a neutral point of view with respect to the methods studied in the contribution. This means that they should not be an author or co-author of one or more of the studied method(s). It is also expected that the contributors do not have a personal interest to promote any of the involved methods in particular.
- The deadline for submissions is **March 15, 2019, 12:00 pm CET**.

Competition guidelines:

- Contributions to the challenge will be evaluated by the IFCS Task Force on Benchmarking.
- Major evaluation criteria will be:
 - the technical correctness and clarity of the report,
 - that the study shows a critical reflection on principles on which a sound benchmarking study should be based (which may be either in line or at odds with the principles outlined in the white paper contributed by the Task Force),
 - a detailed specification of the choices made in the benchmarking study at issue along with a justification of these based on the principles referred to above.
- Up to 8 contributions will be selected for a short presentation during one or two invited sessions at the 2019 IFCS conference in Thessaloniki, Greece (such a presentation will not conflict with giving another presentation at that conference). The authors of the selected contributions will be notified no later than April 25, 2019. Authors of selected contributions who cannot attend the conference will be invited to prepare a few slides on their contribution.
- During the closing session of the IFCS conference one or two of the selected contributions will be proclaimed winners of the challenge. The winners will receive a CRC/Chapman and Hall book voucher.
- Contact for questions: Iven.VanMechelen@kuleuven.be.

All researchers interested in clustering and classification are most welcome to participate in this challenge!

Task force members: Anne-Laure Boulesteix, Rainer Dangl, Nema Dean, Isabelle Guyon, Christian Hennig, Friedrich Leisch, Douglas Steinley, Iven Van Mechelen, and Matthijs Warrens.
