

## **IASE News February 2019**

### **CIVEEST Virtual Congress 21-24 February - Free registration**

The Third International Virtual Congress on Statistical Education is taking place from 21 to 24 February. The conference will have five video plenary lectures broadcast from Granada, Spain, featuring Carmen Batanero, Manfred Borovcnik, Joachim Engel, Iddo Gal, and Juan Godino. The Batanero and Godino lectures will be in Spanish; the other lectures will be in English. In addition to the lectures, there are 15 invited papers and over 100 contributed papers, in a mix of Spanish and English. Conference chats will be available for each paper from the 20th to the 24th, allowing participants from around the world to interact.

The online conference is completely free, but registration is required at the [conference website](#) in order to see the papers and participate in the conference chats. This is an excellent opportunity for people from all countries to participate in a discussion about teaching statistics, probability, and combinatorics.

### **US Conference on Teaching Statistics 16-18 May - Registration open**

The 2019 United States Conference on Teaching Statistics (USCOTS), hosted by CAUSE, will be held at the Penn Stater Hotel and Conference Center in State College, Pennsylvania, USA, from 16 - 18 May, 2019. This every-two-year conference enables teachers of statistics at high school, two-year college, and university levels to exchange ideas and discover how to improve their teaching. The conference features plenary talks, interactive 75-minute breakout sessions, posters-and-beyond sessions, exhibitor technology demonstrations, a banquet with awards presentations, and birds-of-a-feather lunch discussions.

The 2019 USCOTS conference theme of “Evaluating Evidence” is inspired by recent ASA efforts to educate researchers, decision-makers, and the public about sound statistical practice for drawing inferences from data in the twenty-first century. Registration is now open at the [conference website](#), with early bird registration receiving a discount. This conference is not free, but there are some registration fee waivers for those needing financial assistance.
