

## **IASE News December 2019**

### **Presentation Slides from 2019 IASE Satellite Now Online**

In addition to the proceedings, many presenters at the 2019 IASE Satellite have uploaded their slides and posters. Presentation slides, including poster presentations, are available [here](#). These slides complement the paper proceedings, which are available [here](#).

### **New Issue of *Statistics Education Research Journal***

The November 2019 issue of SERJ, Volume 18 Number 2, is now online. There are four regular articles, plus a special article "Short Stories" with reflections on Tom Short's impact in statistics education. Tom Short was the only person to have served as editor of both SERJ and the *Journal of Statistics Education*. Following Tom's untimely death in November 2018, twenty people wrote memories about Tom and Tom's work; those appear in the article.

### **ICME Abstracts and Registration**

The 14th International Congress on Mathematical Education [ICME] will be held from 12 to 19 July, 2020, in Shanghai China. Two topic study groups concern statistics education - Group 11 on teaching and learning of probability, and Group 12 on teaching and learning of statistics. Decisions about paper abstracts have been communicated, but people can still submit a poster for the conference. Registration and housing are also open. For more information, see [website](#).

### **Upcoming Conferences related to Statistics Education**

Many other events related to statistics education are scheduled for 2020 and future years. Some are IASE-sponsored such as the IASE roundtable, ICME, and ICOTS 11. Others are regional, including the 10th Australian Conference on Teaching Statistics, RELME 34 on Latin American mathematics and statistics education, the US-Canada Joint Statistical Meetings, the RSS International Conference, and CERME 12 on European mathematics and statistics education. For a full list, see the listing in SERJ [here](#).
