

Bernoulli Society News April 2020

Statement from the Bernoulli Society President

Dear Members of the Bernoulli Society,

These are times of hardship and worry for all of us, and I hope that we will survive this without great damage. As more or less expected, we had to postpone our World Congress in Seoul this August, due to travel restrictions worldwide, but also out of responsibility for our speakers and participants, also for all local helpers. Our sympathy is with all of them, and in particular with the local organizing committee, led by Hee-Seok Oh, and all other colleagues who have worked so hard for many years for this important Congress to happen.

I am grateful to all colleagues, who have started virtual seminars and workshops. The Bernoulli Society is very happy to help distribute these activities, and you will find some examples below, and on our website. In particular, in these times it is important to keep our community in close contact, as by offering some initiatives in particular to young researchers. Please send such announcements to the publicity secretary Leonardo T. Rolla <leonardo.rolla@gmail.com> for processing.

Hopefully we all stay healthy and in good spirits!

Claudia Klüppelberg
President of the Bernoulli Society

Online seminars:

[One World Probability Seminar](#)

[Oxford Discrete Mathematics and Probability Seminar](#)

[OCIS - Online Causal Inference Seminar](#)

Bernoulli-IMS 10th World Congress in Probability and Statistics (BS-IMS-WC)

19 – 23 July 2021
Seoul, South Korea
www.wc2020.org

The Bernoulli-IMS World Congress has been postponed to **19-23 July 2021**. The Young Researcher Meeting is also postponed and will take place on **17-18 July 2021**.

International Conference on Robust Statistics (ICORS)

6 – 10 July 2020
Vienna, Austria
cstat.tuwien.ac.at

The conference has been an annual international conference since 2001. The aim of the conferences is to bring together researchers and practitioners interested in robust statistics, data analysis and related areas. This includes theoretical and applied statisticians as well as data analysts from other fields, and leading experts as well as junior researchers and graduate students. It will be decided on **20 April** if the conference can be held as planned.

XXIV Brazilian School of Probability

28 July – 8 August 2020
Campinas, Brazil
www.ime.unicamp.br

Because of the spread of the coronavirus (COVID-19) the XXIV EBP/ São Paulo School of advanced science on singular stochastic partial differential equations and their application that is supposed to take place at Campinas University in the weeks of 28 July to 8 August 2020 may not go ahead as planned. A decision about it will be taken around mid of **May**. However, at this moment we still do not want to postpone the event to a later date, and to adjust to the new situation we extended the deadline to apply for financial support to the 30th of April.
