

ISBIS News July 2017

The ISBIS 2017 Report

The ISBIS 2017 meeting at the IBM Watson Research Center on June 7-9, 2017, was a great success. The meeting had 134 attendees and many excellent talks. The participation by statisticians at Google, Facebook, IBM, Dstillery, H2O, The Climate Corporation and other IT companies underscored how ISBIS members are addressing contemporary Big Data problems in business and industry.

ASMBI Special Issue Published

Applied Stochastic Models in Business and Industry (ASMBI), the ISBIS' research publication, recently published a special issue honoring Kathryn Chaloner. The issue, available for free viewing to all ISBIS members, is posted online at [http://onlinelibrary.wiley.com/journal/10.1002/\(ISSN\)1526-4025](http://onlinelibrary.wiley.com/journal/10.1002/(ISSN)1526-4025). Guest editors Isabella Verdinelli and Refik Soyer made a selection of very interesting papers on Bayesian and non-Bayesian experimental designs and applications for this issue.
