

ISI Community

The ISI Community consists of the members of:

- ISI
- [ISI Associations](#)
- [ISI Committees](#)
- [Affiliated Organizations](#)

Associations

ISI Associations cover a range of statistical areas and interests, and together with the ISI, make up the [ISI family](#). The Associations participate fully in the ISI but also have their own governance structures, conferences (including satellite conferences to [World Statistics Congresses](#)), journals and awards.

Association presidents are members of the [ISI Council](#) and also meet as a group with the [ISI Executive Committee](#).

The ISI and its Associations work closely together to serve the needs of the international statistical community.

Committees

Standing Committees are components of the ISI's organizational structure, along with the Executive Committee and the Council.

Operational Committees focus on the overall functioning of the ISI and its long-term concerns as an international body representing the statistical profession and community.

Special Interest Groups (SIGs) focus on matters of statistical interest that may reach across areas of statistics and/or link statistics with other disciplines.

Outreach Committees develop activities, networks and promote and represent the ISI and its Associations in different regions.

Affiliations

Affiliated organizations are mainly professional associations that have entered cooperation agreements with the ISI with the aim of encouraging intensive collaboration and communication.
