

Strengthening Administrative data: what countries have learned and applied from the administrative data collaborative

Abstract:

The UN Statistics Division and the Global Partnership for Sustainable Development Data together with CEPEI have convened a collaborative to provide support and general guidance on how countries can access and use administrative data sources for statistical purposes. For the ISI conference, we propose to invite 3 country members of the collaborative to share their country experiences of strengthening administrative records in a moderated panel discussion without power point presentations. The session will be an opportunity to draw inspirations and experiences from being part of the collaborative and to elucidate the learnings gained and initiatives to strengthen administrative systems.
