

Some Women Trailblazers in Statistics

Lynne Billard, University of Georgia

ABSTRACT

A brief historical introduction to some women who were trailblazers in the statistical sciences is presented. During their times, men dominated the profession. Yet, we see how these women in their various ways blazed trails and as such became mentors and inspirations for generations of women practitioners who worked with them and followed in their footsteps. See Billard and Wallman (2020), ISR.

Key Words: Gertrude Cox, Stella Cunliffe, FN David, Margaret Martin, Janet Norwood, Elizabeth Scott, Helen Walker, and Aryness Wickens.

Session 59: "**Past, Present and Future of Women in Statistics and Data Science**"
